THE PROBLEM

The refund is there. The paperwork stops people

Who needs help

Patients in Puerto Rico who see a provider outside their plan's network: acupuncture, therapy, massage, specialists with long waitlists.

Why it matters

Many patients don't know their plan pays them back. Others give up on the form, the letter, and the provider's signature. So they pay the full cost or skip care.

4 of 4

First Medical 2027 individual plans pay back out-of-network visits, at their top in-network rate minus copay

$240/yr

Triple-S Contigo Fit for acupuncture, massage or reflexology, even on closed-network plans

7 details

the claim needs from the provider, like NPI, diagnosis and CPT codes. First Medical gives 90 days to file

Sources: 2027 policies for 5 Triple-S and 4 First Medical individual plans. Contigo Fit: $20/month, up to 12 months, on 4 of 5 Triple-S plans.

PROPOSED SOLUTION

A straight answer, and help filing the claim

1

Pick your plan

Insurer, then the exact 2027 plan

2

Pick your service

Acupuncture, specialist, glasses, therapy, more

3

Get an answer

Reimbursable? About how much back? Cheaper options

4

Generate the claim

Cover sheet, filled form, policy letter

5

Send to provider

Print, or a prefilled email from your account

6

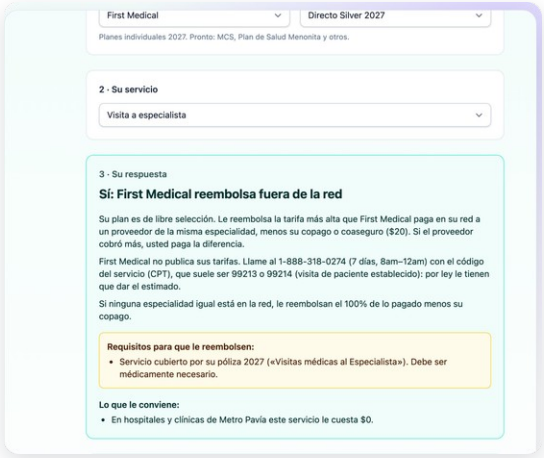

File it

Mail or email to the insurer by the deadline

Before you pay, not after a denial. Spanish-first. No account, no sign-up, nothing stored.

DEMO

From a question to a filled claim

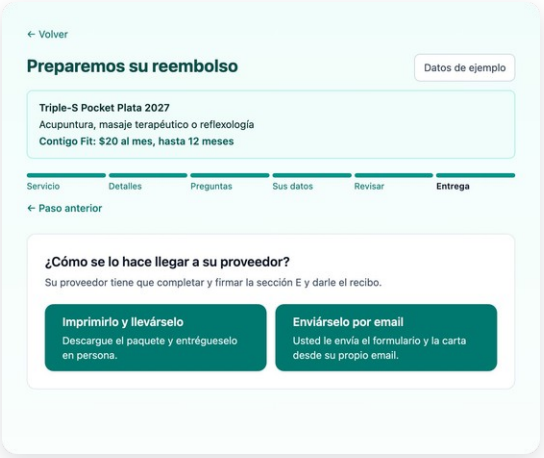

1. A straight answer

Yes or no, what the guidelines are, and your best alternative

2. The insurer's own form

Filled field by field. The provider's section is the only part that stays blank

3. Send it to the provider

Prefilled email or easy-to-print packet, plus the next steps to file

TECHNOLOGY

How it works, and its current limitations

1. **Policy research**
   2027 policies, 9 plans, read with AI agents
2. **Rules in code**
   Network type, rate basis, copays, deadlines, exclusions
3. **In the browser**
   SvelteKit static site. No backend, no database
4. **PDF packet**
   pdf-lib fills the insurer's form and writes the letter

MVP

- Comprehensive analysis of Triple-S and First Medical's 2027 individual plans
- Official insurance forms, filled out automatically
- Prewritten letter with a detailed explanation justifying reimbursement
- Claim data never leaves the device
- Runs locally, and is public, free and open source

Current limitations

- Two insurers so far, individual plans only
- Dollar amounts are published averages, not a coverage decision
- First Medical doesn't publish its rates, so no dollar figure
- The patient still mails or emails the claim
- No provider-side flow yet

NEXT STEPS

Rollout plan and future features

PHASE 1

More insurers

MCS, Plan de Salud Menonita, and the rest of the Puerto Rico market.

→

PHASE 2

Plan comparisons

More comprehensive side-by-side comparisons of plans, benefits and out-of-network coverage.

→

PHASE 3

Provider flow

Provider prints the filled form with the receipt, or gives the patient a QR code.

Future features

- Prescription refunds
- English UI toggle
- Deadline reminders
